JOURNAL OF COMPUTATIONAL AND APPLIED MATHEMATICS

Volume 131, Numbers 1–2, 1 June 2001

Contents

J.-P. Zeng, D.-H. Li and M. Fukushima
Weighted max-norm estimate of additive Schwarz iteration scheme for solving linear complementarity problems 1

T. Kärkkäinen and J. Toivanen
Building blocks for odd–even multigrid with applications to reduced systems 15

C. Gout and A. Guessab
A new family of extended Gauss quadratures with an interior interval constraint 35

Z. Luo and J. Shen
Stability results for impulsive functional differential equations with infinite delays 55

Hamsapriye
A new quadrature rule based on a generalized mixed interpolation formula of exponential type 65

Z.I. Woźnicki and H.A. Jędrzejec
A new class of modified line-SOR algorithms 89

A.F. Beardon
Worpitzky's Theorem on continued fractions 143

I.K. Argyros
A Newton–Kantorovich theorem for equations involving m-Fréchet differentiable operators and applications in radiative transfer 149

Y. Nakamura
Algorithms associated with arithmetic, geometric and harmonic means and integrable systems 161

I. Knowles
Parameter identification for elliptic problems 175

C.B. Collins
The role of Bell polynomials in integration 195

P.R. Johnston and D. Elliott
A generalisation of Telles' method for evaluating weakly singular boundary element integrals 223

K.A. Driver and A.D. Love
Zeros of ${}_3F_2$ hypergeometric polynomials 243

L. Vinet and A. Zhedanov
Spectral transformations of the Laurent biorthogonal polynomials. I. q-Appel polynomials 253

M. Ganesh and O. Steinbach
The numerical solution of a nonlinear hypersingular boundary integral equation 267

M.C. López de Silanes, M.C. Parra, M. Pasadas and J.J. Torrens
Spline approximation of discontinuous multivariate functions from scattered data 281

D.G. Costa, Z. Ding and J.M. Neuberger
A numerical investigation of sign-changing solutions to superlinear elliptic equations on symmetric domains 299

C. Dagnino and P. Lamberti
On the approximation power of bivariate quadratic C^1 splines 321

J.W. Luo and D.D. Bainov
Oscillatory and asymptotic behavior of second-order neutral difference equations with maxima 333

L.-Z. Liao, H. Qi and L. Qi
Solving nonlinear complementarity problems with neural networks: a reformulation method approach 343

I. Moret and P. Novati
An interpolatory approximation of the matrix exponential based on Faber polynomials 361

G. Beckett and J.A. Mackenzie
On a uniformly accurate finite difference approximation of a singularly perturbed reaction–diffusion problem using grid equidistribution 381

K. Burrage and T. Tian
The composite Euler method for stiff stochastic differential equations 407

D.I. Coroian and P. Dragnev
Constrained Leja points and the numerical solution of the constrained energy problem 427

X.-y. Chen and C.-j. Cheng
Reconstruction of relaxation modulus for viscoelastic medium with complete data 445

C. Suárez
About semiclassical orthogonal polynomials of the class (2,2) 457

W. Schönauer and T. Adolph
How WE solve PDEs 473

U.T. Ehrenmark
A note on a recent study of oscillatory integration rules (*Letter to the Editor*) 493

J. Karátson and P.L. Simon
On the stability properties of nonnegative solutions of semilinear problems with convex or concave nonlinearity (*Letter to the Editor*) 497

A.A. Samoletov
A sum containing factorials (*Letter to the Editor*) 503

G. Belforte, P. Gay and G. Monegato
Erratum to: "Some new properties of Chebyshev polynomials" 505

Author Index Volume 131 507
